

Abdul Samad

AI/ML Engineer | Software Engineering Student

+92 316 9515413 | abdul.samad538541@gmail.com | linkedin.com/in/abdulsamad-codes | github.com/abdulsamad-codes | Peshawar, Pakistan

Professional Summary

High-achieving Software Engineering undergraduate student with a **3.96/4.00 CGPA** and practical experience executing technical data roles. Proven ability to build end-to-end Machine Learning pipelines, optimize statistical models, and design intelligent software architectures. Proficient in Python, data preprocessing workflows, and web services. Seeking an AI/ML or Software Engineering internship in Islamabad to apply algorithmic foundations to production-level systems.

Experience & Internships

Artificial Intelligence Intern

May 2026

DecodeLabs | *Remote*

- Collaborated on foundational agentic frameworks and exploratory data implementations using Python engineering principles
- Constructed functional automation scripts to streamline internal data collection and preprocessing routines

Machine Learning Intern

April 2026

Arch Technologies | *Remote*

- Developed a California Housing Price Prediction model using a Random Forest Regressor on 20,640 records, achieving $R^2 = 0.82$ and **RMSE of \$48,941** on the test set
- Engineered a complete pipeline with median imputation, standard scaling, and one-hot encoding to reduce manual data preparation effort
- Built an Email Spam Classifier using TF-IDF vectorization (5,000 features) and Multinomial Naive Bayes on an 80/20 train-test split
- Trained an MLP neural network on the MNIST dataset, achieving **over 97% digit recognition accuracy** across all 10 classes

Machine Learning & Deep Learning Intern

December 2025

Elevvo | *Remote*

- Completed structured hands-on training covering NumPy, Pandas, and TensorFlow model basics across 5 core modules
- Applied Logistic Regression and K-Means Clustering on real-world datasets, evaluating convergence behavior
- Analyzed student performance matrix data to surface hidden operational trends and derive statistically grounded insights

Technical Projects

AgriGuard 2.0 — Multi-Agent Diagnostic System

Python, FastAPI, React, AI Orchestration

- Designed a distributed AI-powered agricultural diagnostics architecture, migrating the frontend from Streamlit to a robust React ecosystem
- Built a high-performance FastAPI backend to handle real-time prediction streams and manage multi-agent orchestration workers
- Implemented robust pipeline connections using Python script automation to manage custom datasets effectively

ViT-GPT2-MC — Radiology Report Generation

Python, PyTorch, LaTeX, Vision Transformers

- Contributed to a technical research paper workflow targeting hierarchical uncertainty quantification in medical image analysis
- Formulated image feature extraction interfaces linking Vision Transformers (ViT) to GPT-2 text-generation layers
- Structured mathematical evaluation matrices inside LaTeX frameworks to clearly present loss tracking and model metrics

Technical Skills

Programming: Python, C++, JavaScript (ES6+), SQL, x86 Assembly
ML / AI / Data: scikit-learn, TensorFlow, PyTorch, Pandas, NumPy, Matplotlib, Seaborn, Random Forest, Naive Bayes, MLP, K-Means
Web & Systems: HTML5, CSS3, CSS Flexbox, Responsive Design
Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code, Qt Framework, Command Line, n8n Automation
Foundations: Data Structures & Algorithms, Object-Oriented Programming (OOP), Graph Theory, Logic & Probability, Feature Engineering

Education

Bachelor of Science in Software Engineering 2024 – Present | Expected: May 2028
Institute of Management Sciences (IMS), Peshawar | CGPA: **3.96 / 4.00** | *1st Position Holder*
Relevant Coursework: Object-Oriented Programming, Data Structures & Algorithms, Web Technologies, Software Design, Database Systems, Discrete Structures, Probability & Statistics

Certifications

- Artificial Intelligence Essentials — University of Pennsylvania (Coursera) | June 2026
- Supervised Learning with scikit-learn — DataCamp | April 2026
- Introduction to Machine Learning & Pandas Tracks — Kaggle | February 2026
- Python (Basic) Competency Assessment — HackerRank | November 2025
- AI For Everyone — DeepLearning.AI / Coursera | January 2025

Additional Information

Languages: Urdu (Native), English (Professional Working Proficiency)
Workflow Focus: Expanding knowledge in XGBoost implementations, Agentic AI, and Workflow Automation
Availability: Immediately available for on-site summer internships in Islamabad or remote tracks
