

ABDUL SAMAD

Data Analyst | SQL · Python · Statistical Analysis · Dashboards & Reporting

+92 316 9515413 | abdul.samad538541@gmail.com | linkedin.com/in/abdulsamad-codes | github.com/abdulsamad-codes | Peshawar, Pakistan (Remote-ready, US hours available)

PROFESSIONAL SUMMARY

Software Engineering undergraduate (CGPA 3.96/4.00, 1st Position Holder) with hands-on experience in data cleaning, exploratory analysis, statistical modeling, and reporting across three internships. Skilled in SQL, Python (Pandas, NumPy), and data visualization (Matplotlib, Seaborn), with a track record of turning raw datasets into clear, decision-ready insights. Seeking a remote, hourly Data Analyst role in the US.

RELEVANT EXPERIENCE

Machine Learning Intern (Data Analysis Focus) · Arch Technologies

April 2026

- Cleaned and analyzed a 20,640-row housing dataset, handling missing values (median imputation), feature scaling, and one-hot encoding to prepare data for modeling and reporting.
- Built a California Housing Price predictive model (Random Forest Regressor), achieving $R^2 = 0.82$ and RMSE of \$48,941 on held-out test data, and summarized findings for review.
- Analyzed a labeled email dataset using TF-IDF feature extraction (5,000 features) and Naive Bayes classification on an 80/20 train/test split, reporting precision and recall on unseen data.
- Evaluated an MLP model's classification accuracy (97%+) across all 10 digit classes on MNIST, documenting performance by class.

Machine Learning & Deep Learning Intern · Elevvo

December 2025

- Applied K-Means Clustering to student performance data to identify distinct performance cohorts, then presented findings with structured visualizations in a written report.
- Ran Logistic Regression and clustering experiments across multiple random seeds, comparing convergence behavior and summarizing results for stakeholders.
- Produced 5 reproducible Jupyter notebooks documenting data manipulation and analysis workflows using NumPy, Pandas, and TensorFlow.

Artificial Intelligence Intern · DecodeLabs (Remote)

May 2026 – Present

- Automated structured data ingestion and preprocessing pipelines in Python, improving data consistency and reducing manual setup time across workflows.
- Built multi-step data processing pipelines using n8n workflow orchestration, coordinating data flow between systems.

RESEARCH

Co-authored a research paper on uncertainty quantification for automated radiology report generation (submitted to Journal of Computer Science & Technology). Evaluated model performance using BLEU score and calibration metrics, and presented results in structured tables and figures.

TECHNICAL SKILLS

Data & Analysis: SQL · Python (Pandas, NumPy) · Excel · Statistical Analysis · Exploratory Data Analysis · A/B Testing Basics

Visualization & Reporting: Matplotlib · Seaborn · Power BI-ready datasets · Structured Written Reports

ML/Modeling (supporting): scikit-learn · Random Forest · Naive Bayes · K-Means · Regression

Tools: Git/GitHub · Jupyter Notebook · VS Code · Command Line · Docker (basic)

Foundations: Probability & Statistics · Data Structures & Algorithms · Database Systems

EDUCATION

Bachelor of Science in Software Engineering

Institute of Management Sciences (IMSciences), Peshawar | 2024 – 2028 (Expected) | CGPA: 3.96/4.00 | 1st Position Holder

Relevant Coursework: Database Systems · Probability & Statistics · Data Structures & Algorithms · Discrete Structures

CERTIFICATIONS

- Artificial Intelligence Essentials — University of Pennsylvania (Coursera), June 2026
- Supervised Learning with scikit-learn — DataCamp, April 2026
- Kaggle Learn: Machine Learning & Pandas — Kaggle, February 2026
- AI For Everyone — DeepLearning.AI / Coursera, January 2025

ADDITIONAL INFORMATION

Languages: Urdu (Native) · English (Professional Working Proficiency)

Availability: Immediately available, remote, flexible with US time zones. Open to hourly/contract data analyst roles.
